Professional Experience

Upskill tech solution Pvt Ltd. Mulund, India
Senior Software Developer & Team Lead

Mumbai
Oct 2022 – Ongoing

- Reviewed and enhanced the existing Skills Connect platform by resolving critical bugs and optimizing complex SQL queries, resulting in significantly faster load times and improved system stability.
- Designed and implemented a dynamic Excel-style data table filter, improving usability and enabling users to filter content with greater ease and precision.
- Led the development of a secure, scalable SaaS version of Skills Connect with modern features tailored for campus hiring platforms.
- Migrated the platform to AWS infrastructure, configured load balancing, optimized SQL load handling, and integrated AWS SES for high-volume transactional emails—replacing traditional SMTP.
- Integrated multiple meeting platforms including Google Meet, Zoom, Zoho Meet, and self-hosted Jitsi Meet using WebRTC on Ubuntu 22.04 for seamless candidate assessments.
- Developed a one-way video recording feature using WebRTC for asynchronous interviews and implemented AWS S3 for efficient asset storage and retrieval

Atto Infotech Pvt Ltd. Dadar, India

- Integrated the major payment gateway such as Razor pay, PayPal, CCAvenue, Paykun, and many more.

BDS Service Pvt Ltd, Kanjurmarg, India
Software Developer Intern

Mumbai
Feb 2018 – July 2018

- Worked on PHP project with other Team Members
- Developed UI, Integrated with backend logic and Rest API

Projects

Skills connect

<https://skillsconnect.in>

Skills Connect is a digital campus hiring platform designed to streamline the recruitment of fresh talent by connecting colleges, students, and companies. Our goal is to bridge the gap between academia and industry, bringing the hiring process closer to the last mile with a focus on:

- **Hyperlocal hiring** to match talent with opportunities in their region.
- A collaborative **ecosystem** that connects colleges, students, and organizations.
- Empowering students to identify growth areas through **webinars, mentorship, and career guidance**.

Footage Farm

<https://footagefarm.com>

Footage Farm hosts an extensive collection of public domain and rights-free archival footage, covering diverse topics such as conflict, culture, education, science, sports, and travel.

- Developed a responsive, feature-rich website using **HTML, CSS, Bootstrap, PHP, MySQL, and JavaScript**.
- Resolved critical bugs and implemented intelligent video categorization by **tags, categories, year, and country**, significantly improving content discoverability.
- Enhanced the **search functionality** and optimized backend queries to boost performance and maintain efficient load balancing under high traffic.

Gryd

<https://gryd.pro>

Gryd™ is a cloud-based mobile and desktop application designed to help employees navigate their career paths while enabling organizations to retain top talent through internal growth opportunities.

- Architected and developed the backend from scratch using **PHP (CodeIgniter)** and **MySQL**, ensuring a scalable and maintainable codebase.
- Built a robust **CI/CD pipeline** to automate deployment and streamline the development workflow.
- Developed an **Excel-like drag-and-drop interface** in PHP, supporting features such as merge, undo, create, and split—enhancing user interactivity.
- Designed and developed a responsive web interface using **HTML, CSS, Bootstrap, JavaScript**, and PHP.
- Diagnosed and resolved critical bugs; implemented intelligent categorization (by tags, year, and country) and an advanced search mechanism to improve performance and content organization.

Supply chain (celerity)

<https://www.supplychaintribe.com>

Supply Chain Tribe by Celerity aims to bring speed to all your supply chain and logistics strategy and action in this time poor world. Through print, online and events, we aim to bring supply chain from the back-end to the boardroom. to persistently explore and uncover business needs pertaining to supply chain and logistics and enable business growth of our readers and subscribers by providing multiple platforms to share, ask and discover best **practices**.

- Designed, Implemented, and maintained the backend using MySQL, PHP CodeIgniter & API calls.
- Created the Curl function to fetch the news and event for the site.
- Created a social sharing functionality on Facebook, Twitter, LinkedIn, Email, and sharable links.

Sevasadan

<https://sevasadan.org>

Our mission is to provide a nurturing and secure environment for vulnerable, underprivileged girls, educate them, enable them to achieve their potential, be self-reliant, and break the cycle of poverty and social deprivation.

- Designed and Implemented backend from scratch using MySQL, and PHP Codeigniter.
- We have developed a CMS system like word press for this website so that editing the content and adding the extra block on pages made it easier.

SirfCoffee

<https://sirfcoffee.com>

Sirf Coffee is a Bespoke Dating Service for the Global Indian. We believe swiping isn't a substitute for a personal connection. Since 2009, we've blended traditional values with modern expectations to bring over 10,000 compatible people together offline.

- Designed and Implemented backend from scratch using MySQL, and PHP Codeigniter.
- Manage the existing core PHP code with new developer Codeigniter code.
- Implemented the Razorpay payment gateway for INR users and PayPal payment gateway for foreigner Users.

Chheda Dry Fruits

<https://chhedadryfruits.com>

The objective of making indian food and snacks conveniently available to your doorsteps, today we offer you all categories ranging from dry fruits, sweets, farsan, namkeen, khakra, mukhwas, bakery items, fresh farsan, pickles and still counting.

- Designed and Implemented backend from scratch using MySQL, and PHP Codeigniter.
- Implemented the Razorpay payment gateway.
